PROFILE

Passionate and detail-oriented software professional with a proven track record in designing and implementing robust, scalable solutions. Proficient in multiple programming languages and dedicated to staying current with emerging technologies. Excels in collaborative team environments and thrives on solving complex challenges to deliver high-quality software solutions.

PROJECTS

ONLINE MEDICARE SYSTEM USING DJNGO:

- This Online Healthcare System project is a web application developed using Python and SQLite database with Django Framework 2.1.5.
- The students can get online prescriptions from various doctors, request an ambulance in emergencies, and get information about the medicines available in the Medical Pharmacy Shop.

DECENTRALISED VOTING SYSTEM USING BLOCKCHAIN:

- Online voting is a web-based voting system that will help you manage your elections easily and securely.
- In this system, the voter does not have to go to the polling booth to cast their vote.
- It is very useful for physically disabled persons and senior citizens.

DATA ANALYTIC IBM:

- Created visualizations and dashboards to effectively communicate findings and recommendations to stakeholders.
- Led a global sales data analytics project where I analyzed large sets of data using tools such as Excel, SQL, and Tableau to identify trends and insights.

DECLARATION

I hereby declare that the above particulars of facts and information stated are true, correct and complete to the best of my belief and knowledge.
